

5

Button for vertical positioning

3

Retention hook:

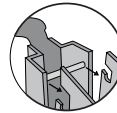

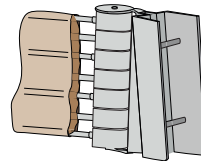

After fitting the awning to the wall bracket and opening it, the left rod must be secured to the retention hook located on the left.

1

Mounting bracket:

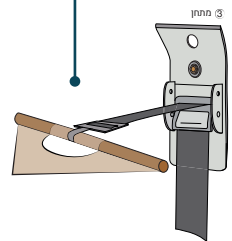

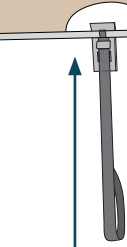

This is fixed to the wall, to which the awning is attached

2

Connect to bracket:

Awning hinge mechanism is attached to the mounting bracket

4

Tensioner grip:

The strap tensioner grip is attached to the right of the awning axis. The strap is fed through the tensioner and pulled vertically to stretch the fabric tight.
